<b>Website :</b>	<a href="https://https://aiensured.com/">https://https://aiensured.com/</a>
<b>Profile:</b>	

An early-stage revenue-making DeepTech startup based out of NOIDA/Bangalore. The company started as an AI testing services company in 2019 and pivoted in 2021 to become an AI Governance platform that helps organizations fulfill AI-related compliance, and risk reduction and improve the quality of the AI products. AIEnsured focuses on five areas when it comes to AI governance: fairness (bias), reliability, security, privacy, and explainability. With various laws getting framed up and a large number of instances where the AI solution had to be pulled back because it didn't meet one of the five criteria, businesses need tools to ensure compliance and provide auditing.

<b>Profile:</b>	

The Data Science Innovation Hub drives tech-forward solutions for public health, one health, and climate change. It unites experts across disciplines, using AI and data science to forecast disease outbreaks and climate impact. Merging historical data with weather patterns, it predicts disease surges for targeted interventions. Recent tools like the Karnataka Dengue Surveillance Platform and PRISM-H app offer real-time data and actionable insights for rapid district-level response, streamlining ASHA worker efforts during outbreaks. Beyond immediate actions, the hub aims to scale its solutions nationally, embodying a tech-driven, proactive approach to fortify public health against outbreaks and climate challenges.
